Maintenance Agreement

Each maintenance agreement will be for a specified period of time for a specific number of licenses of one or more products. This information will be provided on the invoice for the maintenance agreement.

This Maintenance Agreement will be automatically renewed each year unless written notice of termination is received thirty days prior to expiration, by Geotech Computer Systems. Geotech Computer Systems will initiate the invoice when the Maintenance Agreement becomes automatically renewable. The price for a year of maintenance for each product is based on 20% of the list price of the product at the time of the renewal.

Time spent working with the client on software bugs will not be charged against their support time. A “bug” is an error in the specified logic of the software that prevents a function in the software from working, or generates an incorrect result when run with valid data. A flaw in the data that prevents it from being selected, displayed, reported, calculated, imported or exported correctly is not a bug, but a problem with the data. Missing or flawed data, unless caused by the software, is not a bug. An enhancement is a change to the program code to make the program easier to

use; a change to the original or specified logic; a change to the layout or display of a form or report, after it has been created; or an addition to the program. Enhancement requests will be addressed on a case-by-case basis.

While Geotech makes every effort to deliver a quality product that works correctly in all situations, the variability in computer systems, and especially the vagaries of client data, make it impossible to anticipate all of the problems that the software may encounter. We will work with you to correct any problems identified with the software, but the final responsibility for the correctness of any output from the system must remain with the users of the software.

Upon payment by Licensee for this Maintenance subscription, Geotech Computer Systems will provide annually:

1. Up to ten hours of support per license per year for Concurrent, Stand-Alone, or Server Enviro Data;
2. Up to four hours of support per license per year for Concurrent Viewer;
3. Up to two hours of support per license per year for Stand-Alone Viewer, Enviro Spase, or Lab Data Checker ;
4. Up to one hour of support per license per month for Enviro Data Advanced or Concurrent rental;
5. Response to bug reports and user requests via email or phone;
6. Software upgrades during the period the maintenance is active.
