**Note:**  
Prices are subject to change without notice.

Revised 5/19/17

<sup>1</sup> The concurrent use license allows users to share a license, but only as many users at one time as licenses purchased. <sup>2</sup> The Low-Risk Starter Package includes a copy of Enviro Data Single Use, a year of maintenance, and a day each of data loading assistance and training (must be used within 6 months of purchase). Travel time and expenses (if any) are not included. Can be upgraded to Concurrent for an additional \$1,200. <sup>3</sup> The server license is required to implement the Enviro Data model on your client-server database system. Enviro Data client licenses (single or concurrent) are still required, as is a SQL Server or Oracle license for your server. <sup>4</sup> Annual maintenance for each product is recommended, and can be obtained for 20% of the list price per year. Maintenance includes any new software releases during the maintenance period, and email/phone support on software usage issues, up to a maximum number of hours per license per year, by product: Single Use, 8; Concurrent Use and Server, 10; Concurrent Viewer, 4; Enviro Spase and Single User Viewer, 2. A \$500 reinstatement fee will be charged to renew expired maintenance agreements. <sup>5</sup> The Viewer can be used to view but not manipulate data. <sup>6</sup> Available to laboratories to check data consistency using our Reference File system on projects for clients using Enviro Data. A 4% surcharge will be charged on credit card purchases.

**Geotech's products are customizable, and new capabilities can be added.** Some customization can be done by the user, or we can do it for you for a fee. Geotech can even build complete custom graphical, non-graphical, and web-based applications to address specific business or technical needs for which there is no off-the-shelf solution. We have created solutions in a variety of industries using most of the major software development tools. Call us to discuss how these services can be of value to you.
