Note:
Prices are subject to change without notice.

Revised 1/1/18

¹ The concurrent use license allows users to share a license, but only as many users at one time as licenses purchased. ² The Low-Risk Starter Package includes a copy of Enviro Data Single Use, a year of maintenance, and a day each of data loading assistance and training (must be used within 6 months of purchase). Travel time and expenses (if any) are not included. Can be upgraded to Concurrent for an additional \$1,440. ³ The server license is required to implement the Enviro Data model on your client-server database system. Enviro Data client licenses (single or concurrent) are still required, as is a SQL Server or Oracle license for your server. ⁴ Annual maintenance for each product is recommended, and can be obtained for 20% of the list price per year. Maintenance includes any new software releases during the maintenance period, and email/phone support on software usage issues, up to a maximum number of hours per license per year, by product: Single Use, 8; Concurrent Use and Server, 10; Concurrent Viewer, 4; Enviro Spase and Single User Viewer, 2. A \$600 reinstatement fee will be charged to renew expired maintenance agreements. ⁵ The Viewer can be used to view but not manipulate data. ⁶ Available to laboratories to check data consistency using our Reference File system on projects for clients using Enviro Data. A 4% surcharge will be charged on credit card purchases.

Geotech's products are customizable, and new capabilities can be added. Some customization can be done by the user, or we can do it for you for a fee. Geotech can even build complete custom graphical, non-graphical, and web-based applications to address specific business or technical needs for which there is no off-the-shelf solution. We have created solutions in a variety of industries using most of the major software development tools. Call us to discuss how these services can be of value to you.
